

SPRING INTO ACTION

Reduce your organisation's commuting footprint this spring

Unlock your organisation's journey to Zero Carbon Commuting

As more employees head back to the office, it's time to encourage a sustainable future.

A return to the car-based commute no longer makes sense as fuel prices soar, organisations pledge to reduce carbon emissions and air quality worsens. Swindon Travel Choices aims to help promote active travel, which benefits all!

Whether it's walking to work, cycling, catching public transport, sharing the car, or working from home, everyone can benefit.

Time benefits

It may not always be quicker to walk or cycle to work, but it's more reliable. With no unpredictable congestion en route, the door to door journey is the same every day!

Money saving

Walking and cycling are free, whilst car sharing halves the costs. Aside from fuel, using the car less saves on wear and tear too.

Lose the lockdown pounds

Walking and cycling to work builds much needed exercise into your day. If you need to shift excess pounds, or simply want to feel healthier, active travel is the answer.

Play your part for the environment

Everybody has a responsibility to look after the planet for future generations, and every car journey saved means cleaner air and lower emissions.
